

CALCULATING YOUR WATER AND SEWER BILL

Both your water and sewer charges are based on the number of cubic feet of water consumed by your household during the month. This is shown on your statement. The water rate per hundred cubic feet shown below is for up to 30 CCF per month. The sewer rate per hundred cubic feet does not vary by the quantity of water used.

FOR EXAMPLE: If you used 500 cubic feet of water, the number would show as 5CCF, 1,000 would be shown at 10 CCF, etc. You can compute your water and sewer bill by following these steps:

WATER

1. **TAKE** the number of Hundred Cubic Feet (CCF) you have consumed.

This is shown on your statement as (“Consumption”) _____ CCF
Year
 2019 2020 2021 2022 2023 2024

Choose a Year

2. **MULTIPLY** this by _____ per hundred cubic feet **x** 2.73

SUBTOTAL..... = _____

3. **ADD** to this **SUBTOTAL** _____, the basic billing charge..... **+** 3.75

TOTAL -Water..... = _____

SEWER

1. **TAKE** the number of Hundred Cubic Feet (CCF) you have consumed.

This is the same number you used to calculate water charges..... _____ CCF

2. **MULTIPLY** this by _____ per hundred cubic feet..... **x** _____

(Round to the nearest cent) **SUBTOTAL**..... _____

3. **ADD** to this **SUBTOTAL** _____ the basic billing charge..... _____

TOTAL-Sewer..... _____

SANITATION

TOTAL - Sanitation..... _____

GRAND TOTAL..... _____

YOUNGSTOWN RESIDENTIAL HOUSEHOLD

Disclaimer: The totals calculated on this worksheet might vary +/- \$.01 to \$.10 from your actual bill.
