

THE CITY OF YOUNGSTOWN OHIO

CALCULATING YOUR WATER AND SEWER BILL

Both your water and sewer charges are based on the number of cubic feet of water consumed by your household during the month. This is shown on your statement. The water rate per hundred cubic feet shown below is for up to 30 CCF per month. The sewer rate per hundred cubic feet does not vary by the quantity of water used.

FOR EXAMPLE: If you used 500 cubic feet of water, the number would show as 5CCF, 1,000 would be shown at 10 CCF, etc. You can compute your water and sewer bill by following these steps:

WATER

- TAKE** the number of Hundred Cubic Feet (CCF) you have consumed.

This is shown on your statement as ("Consumption") CCF
Year
 2019 2020 2021 2022 2023 2024

Choose a Year

- MULTIPLY** this by per hundred cubic feet **x** 2.73

SUBTOTAL =

- ADD** to this **SUBTOTAL** , the basic billing charge **+** 3.75

TOTAL -Water =

SEWER

- TAKE** the number of Hundred Cubic Feet (CCF) you have consumed.

This is the same number you used to calculate water charges..... CCF

- MULTIPLY** this by per hundred cubic feet..... **x**

(Round to the nearest cent) **SUBTOTAL** =

- ADD** to this **SUBTOTAL** the basic billing charge =

TOTAL-Sewer =

SANITATION

TOTAL - Sanitation.....

GRAND TOTAL.....
