		TRAFFIC COUNT	SPEEDING VEHICLES	%	TRAFFIC COUNT	SPEEDING VEHICLES	%	TRAFFIC COUNT	SPEEDING VEHICLES	%
		28,150	13,149	47%	118,182	13,207	11%	39,279	21,027	54%

*** Speeding vehicles are defined as any vehicle exceeding the speed limit by 10MPH+.

Each speed study was conducted for a five (5) day period, and only includes data during the school day. The morning data indicates the traffic count and speeding vehicles during the "school zone" morning at the lower speed. Mid-day data was measured at the normal speed limit. Similar to the morning, the afternoon data was measured at the lower "school zone" speed limit.

As indicated in the charts, there are significant speeding vehicles in nearly every school zone measured. 47% of all vehicles traveling through the school zone in the morning were speeding, and 54% were speeding in the afternoon, **resulting in over half of all vehicles traveling during the school zones in the afternoon exceeding 10MPH+ over the speed limit.** During mid-day, the raise in speed limits indicates a lesser issue, with 11% of vehicles exceeding 10MPH+ over the speed limit.
